Define the Problem Statements

Date: 30 October 2025

Team ID: NM2025TMID01177

Project Name: To supply leftover food and poor

Maximum Marks: 2 Marks

Customer Problem Statement Template:

Many individuals and organizations struggle with the problem of excess food wastage while countless people go hungry. Food from events, restaurants, and households often goes to waste due to lack of an efficient collection and distribution system. This not only contributes to waste management issues but also fails to support those in need.

A well-organized platform or system is needed to collect, preserve, and distribute leftover food safely to poor and underprivileged individuals. This solution ensures that food is utilized responsibly, hunger is reduced, and sustainability goals are achieved.

Example:

Problem Statement (PS)

PS-1: As a restaurant manager, I want a platform that helps donate leftover food quickly and safely so that food wastage is minimized and the needy can benefit immediately.

PS-2: As a volunteer, I want a system that helps me locate and collect available food donations efficiently so that I can deliver them to the poor before the food spoils.

PS-3: As an NGO coordinator, I need real-time updates on available food donations in nearby areas to plan timely pickups and distributions effectively
